Autodesk Network user base for AutoCAD.

AutoCAD history Autodesk first released AutoCAD in December 1982 as the first desktop app that used the AutoCAD BASIC computer language. In 1983, the first version of AutoCAD contained 2-D drafting and drafting-related features, and with version 2 in 1984, the software included 3-D drafting and 2-D design. (It also supported 3-D parametric design in 3-D Modeling by the late 1980s.) AutoCAD was developed from AutoLISP, the original language developed for AutoCAD by Joe Edelman and John Walker for Autodesk on a DEC PDP-11/70 running on a minicomputer at the Kaiser-Georgetown University Center for Medical Informatics. The DEC PDP-11/70 is an example of a very early minicomputer. (The first minicomputer to use a graphical user interface was the Digital PDP-12, introduced in 1979.) AutoLISP was also used to create the first screen-based graphics programs such as the Autodesk Parametric Shape Modeler (ASPMMSM) and the ViewCalc drawing package. AutoLISP is the language in which the interface elements of AutoCAD were created. The screen-based graphics versions of these applications (ASPMMSM and ViewCalc) were developed on an Apple II and a DEC PDP-11/70 respectively. AutoCAD grew quickly, becoming the leading and most popular CAD program on the
