Create AI or animated images for your designs using the AutoCAD Design Studio, delivered as a web-based service. This service delivers images created by

---

AutoCAD from which  
you can insert into  
your documents.

(video: 1:15 min.)

Replace blocks with  
geometric modeling  
directly in the drawing  
canvas, using

AutoCAD's built-in  
solids and features.

This allows for more  
precise and intuitive  
modeling and reuse of

---

the modeling  
functionality of  
Autodesk® Fusion  
360™. The new Design  
Review Tool allows for  
interactive  
collaboration, a single  
point of entry for  
review and revision, as  
well as providing a  
collaborative space for  
the team to access,  
comment, and

---

approve/reject the design. (video: 1:27 min.) Accelerate your design process with AI AutoCAD Color. Intelligent, interactive color matching, using the AI engine, dynamically renders color into your design. With the new AI Color Match feature in AutoCAD, you can

---

easily apply a color theme for your entire drawing, or just specific items, in a few seconds. (video: 1:34 min.) The collaborative drawing tool, the Comment and Review tool, and Designer Web service now support direct feedback and review of interactive 3D

---

designs. (video: 1:42 min.) Freeform Layers: Fast-track your designs by connecting external references from a live content management system. Freeform Layers provides new tools that enable users to incorporate workflows from an external software platform into

---

your drawings. With Freeform Layers, you can now link a live collaboration tool to your drawings to bring the latest comments, comments, and other content into your design right away. This integration not only provides a quick way to update your design, but also provides a

---

way to add more content into your design faster. AutoCAD wireframes or prototypes, now with support for live content management systems like Bluebeam, Autodesk BIM 360, and others. (video: 1:31 min.)  
Design Manager:  
Share your most
